

PROXAN®-PR-S

Special sprayable cleaner

Uses

PROXAN®- PR-S is a special sprayable cleaner used for cleaning metallic tools that are contaminated with sealant residues which have not yet cured. It is also suitable for cleaning and degreasing joints.

Properties

- Quick and easy to use
- Suitable for cleaning tools and joints

Application instructions

Application

Spray the cleaner onto metallic tools to which unhardened PROXAN® joint sealant residues have adhered, and remove the residues using a rag. When used on plastic or coated components, check whether the surface is damaged. Hardened sealant residues swell when cleaner is applied and can then be removed mechanically. The cleaner is also suitable for cleaning and degreasing joints. Do not store rubber components (seals) in PROXAN®- PR-S as they become unusable due to swelling. PROXAN®- PR-S is flammable – do not use near heat sources or open flames.

Storage

Keep containers properly closed and store in a cool, well-ventilated location. Keep away from heat, hot surfaces, sparks, open flames and other sources of ignition. Protect from sunlight.

Form of supply

Spray can 400 ml: 12 cans per box
